

ViaBTC XMR Mining Guide

1. Download Mining Software

The download addresses of each version are as follows:

amd version: <https://github.com/xmrig/xmrig-amd/releases>

nvidia version: <https://github.com/xmrig/xmrig-nvidia/releases>

cpu version: <https://github.com/xmrig/xmrig/releases>

Note: The version needs to be v2.13.0 and above.

2. Configure

1) When mining with AMD

Please find "start.cmd" under file "xmrig-amd" and open it with a text editor. Settings are as follows:

```
xmrig-amd.exe -o xmr.viabtc.com:8888 -u account.workerid -p x -k
```

Note: Please change **account** to your main account or sub account in ViaBTC pool and **workerid** to miner name.

Click "Save" after change.

2) When mining with NVIDIA

Please find "start.nvidia" under file "xmrig-cpu" and open it with a text editor. Settings are as follows:

```
xmrig-nvidia.exe -o xmr.viabtc.com:8888 -u account.workerid -p x -k
```

Note: Please change account to your main account or sub **account** in ViaBTC pool and **workerid** to miner name.

Click "Save" after change.

3) When mining with CPU

Please find "start.cmdf" under file "xmrig-cpu" and open it with a text editor. Settings are as follows:

```
xmrig.exe --max-cpu-usage 85 --cpu-priority 3 -o xmr.viabtc.com:8888 -u account.workerid -p x -k
```

Note: Please change **account** to your main account or sub account in ViaBTC pool and **workerid** to miner name.

Click "Save" after change.

3. Get started

Please double-click "start.cmd" accordingly.

Note: Port 80 is available too.

```
xmr.viabtc.com:80
```
